EEHC DISTRIBUTION MATERIALS SPECIFICATION**EDMS 30-314-1****28-02-2023****1. SCOPE**

This specification covers the minimum technical requirements for design, manufacturing, testing, and supply of work-wear clothes (coveralls) as personal protective equipment (PPE). The required coveralls are intended to cover or replace personal clothing to protect the wearer's body in the normal work environment of Egyptian Electricity Distribution Companies (EDCs). The coveralls shall meet the requirements of ISO 45001.

2. APPLICABLE STANDARDS

The equipment/material covered in this specification shall comply with the latest edition/amendment of the standards given in Table (1). Where any provision of this specification differs from those of the standards listed below, the provisions of this specification shall apply. Any deviations from the listed standards or the provisions of this specification shall be clearly set out in the offer.

Table (1)

Standard No.	Description
EN ISO 13688	Protective clothing – General requirements
EN ISO 5077	Textiles — Determination of dimensional change in washing and drying
EN 1149-1	Protective clothing. Electrostatic properties Test method for measurement of surface resistivity
EN 530	Abrasion resistance of protective clothing material - Test methods
EN 863	Protective clothing - Mechanical properties - Test method: Puncture resistance
EN ISO 13934-1	Textiles — Tensile properties of fabrics — Part 1: Determination of maximum force and elongation at maximum force using the strip method

EEHC DISTRIBUTION MATERIALS SPECIFICATION**EDMS 30-314-1****28-02-2023**

EN ISO 13935-2

Textiles — Seam tensile properties of fabrics and made-up textile articles — Part 2: Determination of maximum force to seam rupture using the grab method

3. ENVIRONMENTAL CONDITIONS

The safety behavior of the required coverall shall be guaranteed under the environmental conditions given in Table (2).

Table (2)

Minimum ambient temperature	-5 °C
Maximum ambient temperature	+50 °C
Maximum relative humidity	85 %
Storage condition	Dry place
Working environment	Humid tropical climate with heavily polluted atmosphere

4. DESIGN REQUIREMENTS

- The required coverall shall be one-piece with long sleeves.
- The coverall shall be fabricated from shrink-resistant gabardine of at least 80% cotton. The fabric weight of coverall material should be 220 – 240 gsm.
- The coverall color shall be according to _ _EDC requirements. The fabric should resist the change in its color characteristics or transfer its colorant to adjacent materials.
- According to _ _EDC requirements, coveralls shall be available in the following sizes:

EEHC DISTRIBUTION MATERIALS SPECIFICATION**EDMS 30-314-1****28-02-2023**

- Small (S)
- Medium (M)
- Large (L)
- Extra Large (XL)
- Extra Extra Large (XXL)

However, if there are employees who are not compatible with any of the above sizes, the successful bidder shall be able to provide custom made coveralls according to individual measurements.

- The coverall shall be provided with an elastic waistband of 10 cm width. The waistband shall have a sufficient number of attached lugs, with a lug width of not less than 1 cm.
- The coverall shall be provided with a double pocket on the left leg, tow upper front pockets in the chest area (left and right), and two pockets in the back (below the waistband).
- The coverall shall be provided with long, two-way metal zipper with metal closure at the top.
- The stitching is a combination of heavy-duty colorfast threads.
- The coverall bottom shall have a slot with buttons to widen or narrow the slot to be tightly closed to the wearer's foot.
- High visibility reflective tape of at least 5 cm wide shall be placed on the sleeves and legs. This tape shall meet the requirements of EN 471.
- The logo of __ EDC and the full company name shall be clearly written on the back as well as on the front pocket by an appropriate manner. This should be done by either embroidered threads or indelible printing. Logo and color of wordings should be determined by __EDC before bidding.

EEHC DISTRIBUTION MATERIALS SPECIFICATION

EDMS 30-314-1
28-02-2023

- The coverall should be recently fabricated. Manufacturing date should not exceed one year before the bid closing date.

5. MARKING

- Each coverall shall carry a label giving the following information in clearly, indelibly and permanently marking:
 - Manufacture name and country of origin
 - Fabric composition
 - Size of the coverall (S, M, L, XL, or XXL)
 - Manufacturing year
 - Wash / iron care instructions

6. TESTING and INSPECTION

- Material of the coverall shall be subjected to the following tests to ensure the compliance with this specification.
 - Fabric composition, fabric weight and color fastness.
 - Abrasion resistance (EN 530)
 - Dimensional change due to cleaning (EN ISO 13688, EN 5077)
- Tests shall be carried out by an accredited independent testing laboratory (or other testing laboratories accepted by __ EDC).
- __ EDC reserves the right to test another sample selected randomly by inspecting engineer before delivery. In such case, tests shall be carried out in the presence and under the control of __ EDC inspecting engineer.
- All tests shall be carried out by and at the expense of the supplier.

EEHC DISTRIBUTION MATERIALS SPECIFICATION**EDMS 30-314-1****28-02-2023****7. SUBMITTALS**

- The supplier shall complete and return one copy of the attached Data Schedule.
- Technical data and original catalogues shall be submitted with the offer.
- **One specimen** of the offered coverall shall be submitted with the offer for evaluation prior to issuance of the purchase order. The specimen should correspond in all respects with the coverall they intend to supply. Color, Size and dimension verification along with indelible markings and finishing shall be checked.
- A valid approval certificate issued by Egyptian Electricity Holding Company.
- Recent test reports should be submitted with the offer.
- List of deviations & clauses to which exception is taken (if any).

8. PACKING and DELIVERY

- Each coverall shall be packaged in an individual package of sufficient strength to properly protect the product from damage.
- The type of packaging suitable for transport shall be defined by the manufacturer.
- The supplier should provide storage, washing and ironing instructions in Arabic.

9. TECHNICAL DATA SCHEDULE

- The tenderer must fill in thoroughly the attached technical data schedule.
- Any offer does not accompanied with clear and complete technical data schedule shall be rejected.
